Full Stack Student

An enthusiastic developer student with 6 months of freelancing experience in developing and maintaining web applications developing API to manage data, using HTML, CSS, JavaScript, Java Spring, and PostgreSQL. Delivering a notable 20% increase in productivity. Complementing this, a three-month internship enhanced my adaptability and collaborative skills. Notably, I optimized website functionality, achieving a significant uptick in user engagement and revenue. With a proven track record and a holistic skill set, I'm eager to contribute my expertise to your team's goals. Let's innovate together!
